

BREAK OUT SESSION

Construction – Compliance

- Inspections & Violations

- What types of violations are you finding most common?

- Which violations/violators are the hardest to get back in compliance?

- When is a failed BMP a permit violation? What are the challenges of holding non-filers accountable for failed BMPs?

- Compliance

- How do you look for sites that are operating without a permit?
When/how often are you taking enforcement actions against unpermitted dischargers?
- What type of maintenance requirements exist after construction completed? How do you ensure these are completed, especially outside MS4s?

- Compliance

- What methods are being used to communicate with large developers to encourage compliance?
 - How are states holding operators accountable for BMPs left behind after project completion?
 - What are the NPDES eReporting Rule requirements for the construction stormwater program?
-
